

In 2009, the Toccoa Police Department continued its partnership with Pioneer RESA in providing child safety seats to underprivileged primary caregivers of children. During the calendar year, we installed over 75 child seats. In 2009 the Toccoa Police Department received an additional grant award to continue this program into 2010. The department added two certified safety seat technicians to their staff and seeks to add an additional technician in 2010. The department's training staff is currently working to develop a certification course to assist patrol officers with recognizing gross misuse of child safety seats in effort to raise awareness and educate motorists.
